

Abstract

Infect Immun. 2008 Sep;76(9):3837-43.

Vitamin D signaling, infectious diseases, and regulation of innate immunity.

White JH.

Department of Physiology and Medicine, McGill University, Montreal, Quebec, Canada.

OUTLINE OF PAPER:

Introduction

Vitamin D Insufficiency/ Deficiency and Disease

VDR Polymorphisms and Infectious Diseases

Molecular Mechanisms of Action of Vitamin D

Vitamin D Signaling and Metabolism in the Immune System

1,25D is a Direct Inducer of Antimicrobial Innate Immunity

Species-specific Mechanisms of AMP Expression

PMID: 18505808
